

# **INS Lab**

We are going to install the “perfect” Ubuntu desktop client & server.

Each will have their own VM. When both are installed they will be able to communicate with each other.

## **1. Install a new desktop client**

This [tutorial](#) shows how you can set up an Ubuntu 12.04 (Precise Pangolin) desktop that is a full-fledged replacement for a Windows desktop, i.e. this has all the software that you need to do the things you do on a Windows desktops. Ubuntu 12.04 desktop features are detailed [here](#).

## **2. Install a new server**

Now, we will install a new instance of Ubuntu Server 12.04 following this [tutorial](#).
