MONTHLY REPORT : JANUARY

Student Name: Robert Gabriel

Organisation: teamwork.com

Month Commencing :

1. Evaluation of workplace progress

I started on the 12th of January. I am getting on great so far. I spent the first two weeks working under the Michael "MJ" Heffernan who is head of support. I was shown around the office and inducted to people. I was told and thought about the company and how to use the Teamwork software. Along with the software that the chat team uses that will be interning under. I was giving tasks about finding bugs with the software and reporting it and giving it to people to assess too. Then the third and fourth week I got set up with the chat team working under Adam Lynch and Donal. I was inducted to different languages which include gulp, Node, knockout and coffee script.

2. Critical Learning Experiences

By the end of the first month I inducted to the following

Working as a team, speaking up when needed.

I learnt About the following :

Golang : Go is an open source programming language that makes it easy to build simple, reliable, and efficient software.

Gulp Gulp is a Task / Build runner. If you take a look at the Gulp.js site you'll see some of the things Gulp can bring to the table. It's easy to use, has a simple api, and is efficient.

Node.js :Node.js is an open source, cross-platform runtime environment for server-side and networking applications. Node.js applications are written in JavaScript, and can be run within the Node.js runtime on OS X, Microsoft Windows, Linux, FreeBSD, NonStop and IBM i.

Knockout.js Knockout is a JavaScript library that helps you to create rich, responsive display and editor user interfaces with a clean underlying data model. Any time you have sections of UI that update dynamically (e.g., changing depending on the user's actions or when an external data source changes), KO can help you implement it more simply and maintainably.

Npm : npm is a package manager for JavaScript, and is the default for Node.js. As of Node.js version 0.6.3, npm is bundled and installed automatically with the environment. npm runs through the command line and manages dependencies for an application.

GitHub is a web-based Git repository hosting service, which offers all of the distributed revision control and source code management (SCM) functionality of Git as well as adding its own features.

Coffeescript Behind the scenes CoffeeScript is using constructor functions, which means you can instantiate classes using the new operator. `animal = new Animal.` `var animal; animal = new Animal;` Defining constructors (functions that get invoked upon instantiation) is simple, just use a function named constructor .

Tasks I completed.

| | |
|--|--|
| Windows: Can no longer double-click top to maximize | |
| Feedback button | |
| docs.teamwork.com: On a phone, some images overflow page | |
| Keyboard combination to enable dev keyboards shortcuts | |
| Can't open dev version while prod version is open | |
| Test Project pm | |
| Test chat software | |

3. Reflection

The first month I was there I was getting used to a lot more language that were a huge step up to what I'm used to in college. The above experiences can be applied to learning outcomes because it makes you want to work harder. You know that you are working towards a goal after college. That is why I think work placement is good it gives you a feel for the real world. A lot of the system administrator subjects I learned in college came in handy for my work place such as computer hardware and system admin.

I learnt that it's important to ask questions if you get stuck on anything. I was quite shy for the first 4 weeks.

MONTHLY REPORT : FEBRUARY

Student Name:

Organisation: teamwork.com

Month Commencing :

1. Evaluation of workplace progress

For the second month of placement I go more in with the team and began working on the the inner workings of the teamwork chat messaging app. I was there for the launch of it as well. Im learning more about the inner working of the software and how to share code and reviews. I started to break more out of my shell as well.

1.22

2. Critical Learning Experiences

Teamwork.

Speaking up when lost.

Saving work.

Reflection

By the end of the second month I was after being given tasks and getting used to what to do. I made close friends and I learnt the importance of speaking up and asking questions but also the fact that college and work place are two different things. I was given plenty of tasks and learning so much its scary. This never have been possible if it wasn't for cit.

MONTHLY REPORT : MARCH

Student Name: Robert Gabriel

Organisation: teamwork.com

Month Commencing : March

1. Evaluation of workplace progress

March was a funny month because I had to a lot of work on teamwork chat that I was struggling with cause of how custom the code was and how new it was. Throw in the deep end but I also helped out on the api with Jago who I shared the office with. I was then asked to help out with James Drapper who is a web developer with the website (written in cold fusion) and Teamwork Pm (now projects). I was asked to help out with the rebuild of the website and help finish it before the launch of the Desk , which they where having a huge part. James sadly had to go to hospital. So I was given the task of completing the redesign and rebuild in 3 days. At the company meeting. I spent the days from 9am until 4am or 6am on the night before getting everything ready. There was a small panic but I got everything done with 4 hours to spare. I was thanked and clapped for what I did and they even bought me a iPad air and gave me more access and work to do cause I was trusted and tested myself. I learnt a new langue in 24 hours. I also got to work closely with the with head designer and make choices on how the website should work.

2. Critical Learning Experiences

Cold Fusion :ColdFusion is a commercial rapid web application development platform invented by Jeremy Allaire and JJ Allaire in 1995.

Node.js : Node.js is an open source, cross-platform runtime environment for server-side and networking applications. Node.js applications are written in JavaScript, and can be run within the Node.js runtime on OS X, Microsoft Windows, Linux, FreeBSD, NonStop and IBM i

Time Management

Repairing life websites

3. Tasks I completed

1.4.15

3. Reflection

To quote the people I worked with 'this is some workplacment' I never thought I would be trusted but this is more i have learned in the past month then I have ever in college. The skills I have gotten at this point are priceless. As you can see I did a lot of tasks that tested and thought me many things.

MONTHLY REPORT : APRIL

Student Name: Robert Gabriel

Organisation: [teamwork.com](http://www.teamwork.com)

Month Commencing :

1. Evaluation of workplace progress

For the Start of April I was given the Task along with another intern Colm to rewrite there api from Cold fusion to Golang. They said I have gained there trust and was given more changeling tastes. At the same time the cleaning up the website for the arrival of the head front developer called Peter S. You can see the work I have done <http://www.teamwork.com> and <http://deveolper.teamwork.com:8081> . I was also given the task of setting up the api documentation.

2. Critical Learning Experiences

Golang. Go is an open source programming language that makes it easy to build simple, reliable, and efficient software.

Api : a set of functions and procedures that allow the creation of applications which access the features or data of an operating system, application, or other service.

Shell Scripting : A shell script is a computer program designed to be run by the Unix shell, a command line interpreter.

3. Tasks I completed

| Name | Start Date | Date Due | Priority | Assigned To | Assigned By | Date Created | Completed By | Date Completed | Time | Billable | Estimated |

4. Reflection

By the time of writing this, I have come to be a full time developer within teamwork given tasks that effect customers and changeling new tasks everyday. I have to admit that I have learnt more within here in the past 3 months then I have in the last 3 years in Cit. In terms of life and work place skills.
